Another part programme is the idea of crating mobile phones in respect to other students when using phones.

Other part of visioning is appreciative inquiry looking at solutions instead of looking at the problem.

Teachers and students are focusing on world class teaching.

Idea is for Ulladulla High School is be a World class school, were student can voice, uses choices, give and receive support, be part of production, engage in strength based values, sustained and disciplined process in global organisations.

Engaging students in projects which enhance and broaden their skills.

For students in year 11 and 12 in the first stage. Each student participating in the programme would have a mentor, students would be working with businesses and organisations in the mentoring program, this programme is more in depth than work experience. Growth coaching talking to students about goals, to stay on track with their goals, mentors would be required to assist student with maintaining goals. Idea is to be other voice and person in the student life. Denise stated that the mentoring program is still in the planning stage and once it was ready to be implemented Denise suggest that could it be possible to use the club as a partner in the program.
