MASK MAINTENANCE

The World Health Organisation is silent on prescribing a particular number of washes given it is impossible to provide such specific guidance but they do issue general guidance on Pg 10 (Section F) of the 5 June 2020 Release.

- Masks should only be used by one person and should not be shared.
- All masks should be changed if wet or visibly soiled: a wet mask should not be worn for an extended period of time. Remove the mask without touching the front of the mask, do not touch the eyes or mouth after mask removal. Either discard the mask or place it in a sealable bag where it is kept until it can be washed and cleaned. Perform hand hygiene immediately afterwards.
- Non-medical masks should be washed frequently and handled carefully, so as not to contaminate other items.
- If the layers of fabrics look noticeably worn out, discard the mask.
