The Project is focusing on the needs of the Youth covering from small projects including picking up three bits of rubbish to larger issues such as climate change. Invite the Youth to form a committee to focus on the issues that affect them today. The idea is

for the Youth to develop projects from the ground up, giving committee members governance training, leadership skills to assist with undertaking an event, using social media to assist with getting the word out regarding different topics and working with other organisations to assist with mentoring of the Youth committee, working with other committee and older people to pass on knowledge to the younger generation.

Monica then spoke on the plan to have events in the near future will focus on what is troubling our young people at this time. Having a panel of people so the young people have more than one prospective on the issue that is the focus. Giving them a road map for the future. Young people really want to make a change and are passionate about change.

Monica then explained to members on how some of the young people in our town went about how to make a difference in our area and the different projects young people had worked on recently.

Monica is passionate about giving the young people in our area an opportunity to have a voice. Monica then went on to give the members an outline of the projects the young members of the community could be involved in, including a permaculture program. Monica then went on to explain to the members of the vision for the area with a permaculture garden in Milton and the benefits it would bring to the area.

Building on resources in the area and the creation of jobs. Monica is hoping to return to the club once the program is up and operating to show members how it is working.
