## “PRESIDENTIAL MESSAGE”

**April 2018, RI President Ian Riseley**

Environmental issues are deeply entwined in every one of our areas of focus and cannot be dismissed as not Rotary's concern. Pollution is affecting health across the globe: More than 80 percent of people in urban areas breathe unsafe air, a number that rises to 98 percent in low- and middle-income countries. If current trends continue, by 2050 the oceans are expected to contain more plastics by weight than fish. And rising temperatures are well-documented: Global annual average temperatures increased by about 2 degrees F (1.1 degrees C) from 1880 through 2015. That this change was caused by humans is not a subject of scientific debate, nor is the likelihood of vast economic and human disruption if the trend continues unchecked. The need for action is greater than ever – and so is our ability to have a real impact.

As past UN Secretary-General Ban Ki-moon put it, "There can be no Plan B, because there is no Planet B." Our planet belongs to all of us, and to our children, and to their children. It is for all of us to protect, and for all of us in Rotary to make a difference.

Grace: “For good food, good fellowship, and the privilege to serve through Rotary we give thanks.”
