**Guy Porter (New Member Talk)** is a highly trained and successful computer specialist. He was born in Sydney and his school years passed by until he was 19 when he was a passenger in his mates' car and got thrown through the windscreen where his eye ball came out. He spent 3 weeks in intensive care and from there knew that computers would be his life.

Guy learnt all the old computer systems, i.e. the Tape Drives, Hard Drives and the very old Processors. Guy met his wife Julie and they were married in the early 80s and bought a house in Chipping Norton which flooded. Not long after Guy and Julie moved to Canberra where he successfully worked for Logica.

Guy and Julie have a love of snow skiing and moved to Thredbo and in the off season they worked in the Whitsundays when again they experienced hard times with flooding.

Guy and Julie moved to Ulladulla and in April 1994 Perfect Business Partners was started eventually changing their name to CompuPort. They support all computer users from home users to the largest of business enterprises. CompuPort has continued to grow in both size and the range of services and products they offer.

In 2006 CompuPort strengthened it's position as the local areas premium supplier in the computer arena by teaming with the Leading Edge Group and became known as CompuPort Leading Edge Computers. This fantastic partnership gives us the ability to offer the local area services and products previously only available in major metro areas.

Guy employs locally highly trained computer nerds much like himself and ensures ongoing certification and training ensures we are able to offer the highest standard of support which is backed-up by access to over one hundred Australia wide computer specialist outlets under the Leading Edge Computers banner. The Aim: Simply put, CompuPort was formed to provide the local area with local computer support and continue to do this.

Guy engages in ongoing training with Apple approximately every 6 months to ensure he is fully certified. You are dealing with one of the best when you come and see Guy. So, if you need help with downloading photos to storing to very technical computer issues Guy is your person.

***Thank You AVRIL PRYOR for the meeting's report.***
