## PRESIDENT'S REPORT

President Bernie cited the Rotary DEI (Diversity, Equity, Inclusiveness) statement:

*“As a global network that strives to build a world where people unite and take action and has to create lasting change, Rotary values diversity and celebrates the contributions of people of all backgrounds, regardless of their age, ethnicity, race, colour, abilities, religion, socioeconomic status, culture, sex, sexual orientation, and gender identity” and further “notes that the respectful treatment of all members – as well as of all others with whom Rotarians connect - is essential to furthering goodwill and cooperation. Whatever our condition, we cannot expect respect ourselves if we fail to give it to others.”*

He then asked each member to reflect on this statement and how it sits with them. It is an essential characteristic of a true Rotarian that they feel and show respect for all.

## GUEST SPEAKERS

Brian Morrison spoke about his recently acquired Tesla 3 and declares it to be “the future of motoring”.

We gained insights into the acquisition costs (not as bad as the sticker price suggests), servicing costs (a couple of hundred dollars a year), running costs (nothing as he uses his solar power) and range anxiety (he plans his trips and with 470km available, it’s no problem).

All in all, he is very happy with the switch.

**FILM NIGHT**

**Tuesday 6<sup>th</sup> December at  
 6:60pm at the Arcadia  
 Cinema, Ulladulla.**

LOST for over 500 years, the remains of **King Richard III** are discovered beneath a car park in Leicester. This stranger than fiction true story forms the basis of Stephen Frears' (Victoria & Abdul) latest work, following an amateur historian played by **Sally Hawkins**, (Maudie, Made in Dagenham) as she battles bureaucracy in an epic quest to locate the final resting place of the infamous King Richard III.

The search is executed by Philippa Langley (Hawkins), whose never-ending research meets with confusion by her friends and with ridicule by her peers. Hawkins, alongside co-star **Steve Coogan** (Philomena, BFF13) brings a life-affirming story to the screen of a woman who forced academics and scholars to rethink everything they knew about one of the most controversial Kings in British history.

With a script co-written by Coogan and Jeff Pope (Philomena, BFF13), they once again team up with Frears and craft a story displaying a tension between past and present. Hawkins acts as the nerve centre of this incredible story, depicting a woman

who fights ferociously to redeem Richard's legacy whilst simultaneously working to change others' misconception of her. A riveting piece that will delight film and history buffs alike.
